Project name	Calculating Family Expenses Using Service Now
Maximum mark	

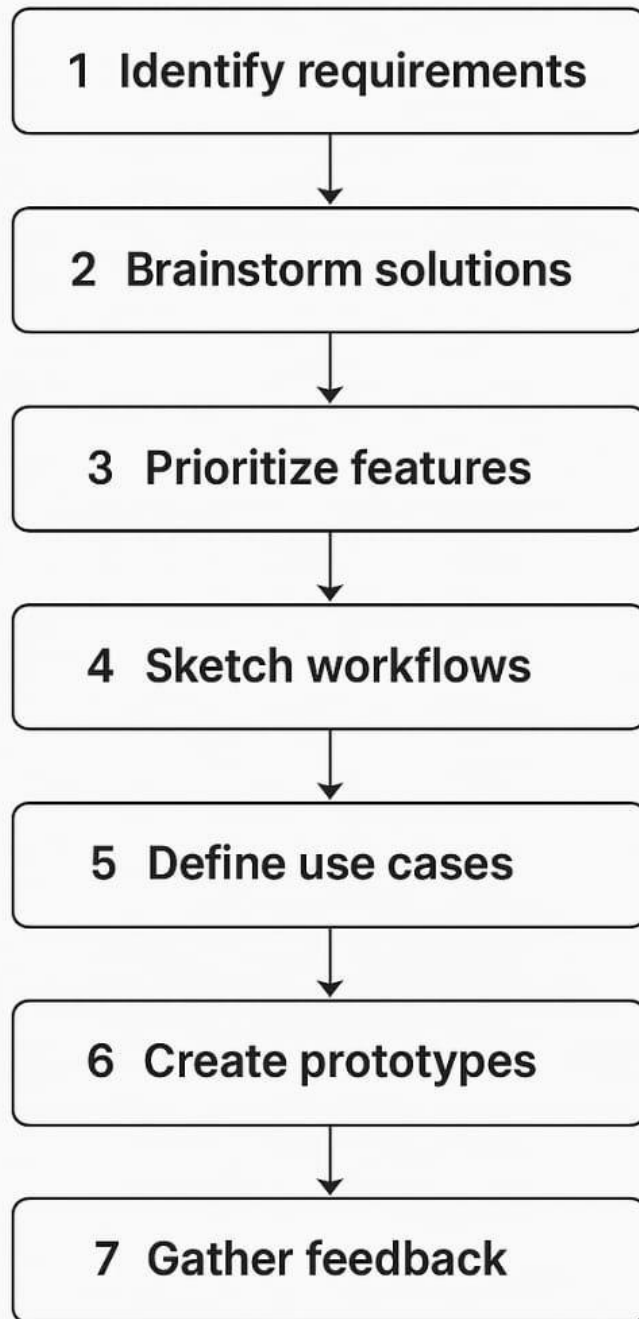

Brainstorm, Idea prioritization

Ideation Phase

The ideation phase for the Calculating Family Expenses using ServiceNow project focuses on brainstorming and defining innovative ways to simplify and automate expense tracking. In this phase, ideas are generated on how to collect, categorize, and analyze household expenses efficiently using ServiceNow's workflow automation. The team explores solutions like creating expense submission forms, automated approval workflows, and monthly budget reports.

Step 1: Team Gathering, Collaboration and Select the Problem statement

Ideation Phase for Calculating Family Expenses using ServiceNow

Step 2: Brainstorm, Idea Listing, Grouping

Step-2: Brainstorm, Idea Listing and Grouping

7

Brainstorm

Write down any ideats that come to mind that address your problem statement.

Step 3 : Idea prioritization

Step 3: Idea prioritization

Calculating Family Expenses Using ServiceNow

- **Brainstorm**
Write your ideas on the sticky notes.
Consider categories like housing, groceries, transportation, and utilities
- **Group Ideas**
Group similar ideas together.
Place related sticky notes closer to each other on the grid

In the “Step 3: Idea Prioritization” stage of the Calculating Family Expenses Using ServiceNow project, all brainstormed ideas are reviewed and ranked based on their importance and feasibility. Each idea, such as automated expense tracking, report generation, and budget alerts, is evaluated for its impact, cost, time, and ease of implementation. The ideas are then arranged on a 3×3 grid, where high-impact and easily implementable ideas are placed at the top-right corner, indicating top priority. This helps identify which ideas will bring the most value to the project, ensuring focus on practical and efficient solutions like automated calculations, categorized expense tracking, and visual dashboards that make managing family expenses easier and more organized.
