

Date	2/11/2025
Time id	NM2025TMID07789
Project name	Calculating Family Expenses Using Service Now
Maximum mark	2 marks

PROJECT DESIGN PHASE

PROPOSED SOLUTION

Proposed solution template

S.No	Problem Area	Proposed Solution	Expected Outcome
1	Manual tracking of family expenses is time	Automate expense entry and categorization using a ServiceNow custom form and workflow	Reduced manual effort and accurate expense tracking
2	Difficulty in organizing monthly expense data	Create a ServiceNow table with categories like food, bills, education, and transport	Well-structured and organized monthly expense records
3	Well-structured and organized monthly expense records	Implement ServiceNow dashboards and reports to show expense distribution	Easy-to-read visual charts showing monthly spending patterns
4	No centralized access for all family member	Enable user roles and permissions so each member can input their expenses	Centralized system accessible to authorized family members
5	Difficulty in identifying overspending areas	Configure ServiceNow flow logic to highlight categories exceeding set limits	Instant alerts or notifications for overspending
6	No summary or comparison between months	Build ServiceNow reports to generate monthly and yearly summaries	Automated summary reports showing expense comparisons
7	Inefficient data storage and retrieval.	Use ServiceNow database tables for storing expense records securely	Secure, fast, and reliable data storage and retrieval system.

Proposed Solution Template: Calculating Family Expenses using SericeNow

	Problem Area	Proposed Solution	Expected Output
1	Manual tracking of family expenses is time-consuming and error-prone	Automate expense entry and categorization using a ServiceNow custom form and workflow	Reduced manual effort and accurate expense tracking
2	Difficulty in organizing monthly expense data	Create a ServiceNow table with categories like food, bills, education,	Well-structured and organized monthly expense records
3	Lack of visualization for total and category-wise spending	Implement ServiceNow dashboards and reports to show expense distribution	Easy-to-read visual charts showing monthly spending patterns
4	No centralized access for all family members	Enable user roles and permissions so each member can Input their expens	Centralized system accessible to authorized family members
5	Difficulty in identifying overspending areas	Configure ServiceNow flow logic to highlight categories exceeding set	Instant alerts or notifications for overspending
6	No summary or comparison between months	Build ServiceNow reports to generate monthly and yearly summaries	Secure, fast, and reliable data storage and retrieval sys-
